# WEATHER OF CONCERN

## Weather of Concern

- Morning temperatures will be colder than normal in the wake of recent rains bringing areas of frost to Southern California valleys

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/wwa\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php)

# **WEATHER SYNOPSIS BY REGION**

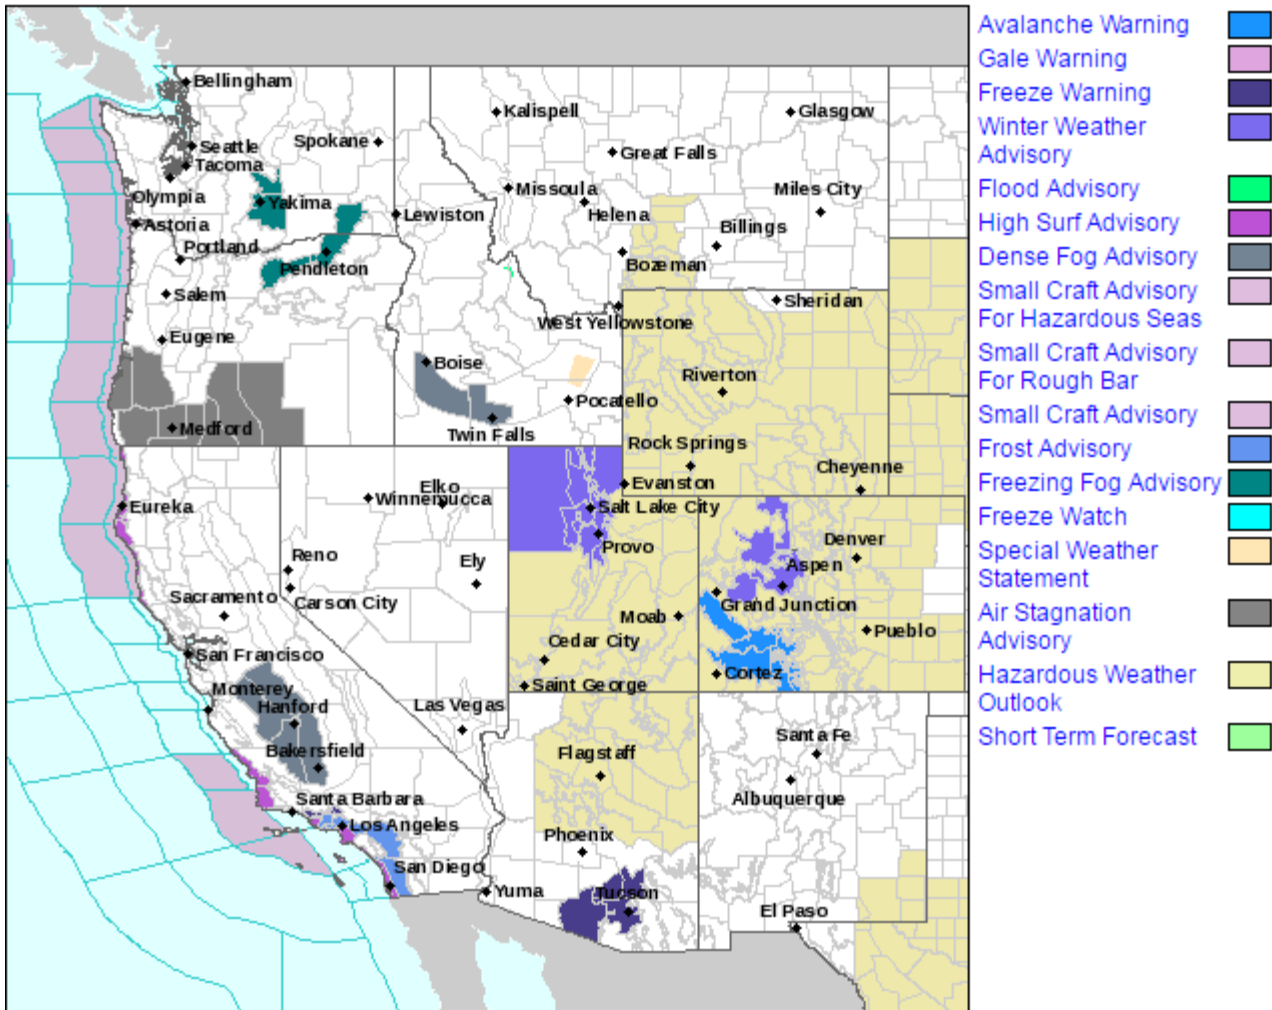

## **NORTHERN CALIFORNIA**

Mostly clear and dry conditions as high pressure begins to build over Northern California through much of Wednesday. However, a weak disturbance will produce mostly cloudy skies and scattered light precipitation Wednesday night and Thursday. Snow levels will be 2000-4000 feet and totals will mostly be under 0.10 inches. High pressure will return stronger by Friday and begin a warming and drying trend with occasional gusty offshore winds through next Tuesday. At this time it appears that the storm track will return to the North Ops region next Wednesday.

## **SOUTHERN CALIFORNIA**

Temperatures will remain 10 to 15 degrees below normal today, with upper 20s and 30s across the mountains and mid 40s to mid 50s in the valleys. There will be a slow warming trend Wednesday through Friday, but temperatures will remain below normal as a weak trough moves inland across Northern California and then into the Great Basin. Isolated showers will be possible from a Monterey/Fresno County line northward tonight through Thursday afternoon. Winds will be light across the region through Thursday. Significant warming along with very low humidity will take place this weekend as a strong ridge of high pressure builds into California from the Pacific Ocean. North to east winds of 20 to 40 mph with gusts to 60 mph will surface across the mountains and below the canyons and passes of Southern California Friday morning through this weekend. The ridge of high pressure will weaken bringing a cooling trend and an increase in humidity early next week. Winds will become light early next week.
